

I am *FIRMLY* against the idea of a "broadcast flag" on digital television programming. This reduces the copyright "fair use" doctrine to not being applicable to these broadcasts, as well as making the large quantity of LEGITIMATE HOME USE of these broadcasts unavailable. (I.E. Time-Shifting).

The FCC is a PUBLIC agency, and as such works for the PUBLIC, not the Hollywood/MPAA/RIAA.

Please reject this idea NOW and make a firm policy stance that the legitimate public has the right to use the material using OUR AIRWAVES in legitimate ways not necessarily foreseen by the industry.
